SUMMARY

A self-motivated tech enthusiast with experience in both hardware and software. I am currently pursuing my bachelor's degree in Computer Science, with a focus on project management and software development.

I have many years of experience in the IT industry where I have enjoyed the challenge of maintaining my education in a fast paced field. The time I have spent as an IT consultant has given me valuable experience working with small and medium businesses on solving important problems within restrictive budgets. Because of these experiences, I have developed a talent for creative problem solving that would be an asset for any modern company.

SUMMARY OF SKILLS

- Eight years of extensive Computer and Equipment repair experience
- Five years IT/networking experience
- Four years of programming experience, specializing in php and mySQL driven web applications.

Languages:

- Git Repository – <https://github.com/plusonedev>
- Proficient in: PHP, JavaScript, Python
- Familiar with: C, Visual Basic
- Databases: MySQL, mongo DB, becoming familiar with neo4j (graph database)
- Platforms: Windows server, Linux server (specializing in Debian and its derivatives)

EXPERIENCE

IT Manager

6/30/2010 - Current

Bishop Energy Services

- Management of a Windows and Linux based network, Active Directory based authentication, and MySQL database management. All systems run virtualized on a VMware ESXi server.
